Silky™ – Looped End Mop

The ultimate in floor finishing mops

- Marino's lint free finishing mop will leave your floors streak free and with approximately 25% more shine due to its unique lint free yarn.
- Narrow band looped end construction gives Silky a longer life and allows mop to cover a larger floor area – leaving more finish on floor.
- All mops are individually poly-bagged.

Code	Description	kg	lbs	Cube m	Cube ft	Pack
FFSILKY16	Lint free nylon floor mop - narrow band	5.9	13.0	.034	1.2	12
FFSILKY20	Lint free nylon floor mop - narrow band	6.8	15.0	.044	1.56	12

Super Waxer™ Finishing Mop

Looped end candy stripe

- Ideal when frequently applying floor finish.
- Heavy duty poly coated headband mesh withstands harsh chemicals, launderings for the life of the mop and abuse when headband is used as a scrubber.
- Specially blended yarn designed for high absorbency while allowing for quick release of floor finish.
- Tightly twisted yarn increases durability, eliminates linting and streaking.
- All mops are individually poly-bagged.

UltraSpeed Floor Mopping System

Simple to use and flexible enough to clean difficult areas, the UltraSpeed System offers maximum cleaning performance and speed of use, with significantly reduced mopping times.

UltraSpeed is a comprehensive floor cleaning system that sets new standards in usability, versatility, efficiency and ergonomics. The benefits can be summarised in a single sentence: Performance made easy. Problems with traditional mopping?

There are many problems associated with traditional mopping methods:

Poor Hygiene:

- Traditional mop heads suffer from poor appearance after several uses and can smell

Low Performance:

- Traditional/Kentucky mop heads are hard to control and it is easy to splash water on furniture and skirtings
- Large amounts of water are stored in the mop head causing aquaplaning to occur resulting in dirt being moved around the floor rather than removed from it
- Heavy to use, placing strain on shoulders and backs.
- Difficult to insert into the mop bucket and press

Difficult to Use:

- Cannot clean walls and skirtings
- The machinery often involves complicated gear press mechanisms that can break
- Low durability wheels that often cannot be replaced

UltraSpeed is the answer!

The UltraSpeed System is based around an innovative wringer, break frame, and a high performance mop pad.

Hygienic:

- Modern professional design with no need for on-site training
- Microfiber mop pads are machine washable over 100x @ 80°C /176°F

High Performance:

- Floors dry 35% faster and are back in use twice as fast
- 100% Microfiber mop pads give improved cleaning performance and 29% faster removal of stubborn dirt and stains
- Over 50% faster cleaning over 50m² than cotton Kentucky mopping and over 60% faster than socket mopping
- Changeable colour-coding system reduces SKUs and improves versatility

Easy To use:

- Controlled cleaning with the flat mop frame, no splashing of other surfaces and easily cleans skirting boards and walls
- 50% lighter in use, reduces strain on users' backs and shoulders
- Chassis system allows buckets to be detached, reducing the weight when emptying and filling
- A full range of spare parts is available

Ultraspeed Floor Mopping System

Staircases

Versatile

Controlled cleaning with the flat mop frame, no splashing of other surfaces

Walls

Skirting's

Floors

Colour Coded

Changeable colour coding system reduces SKUs and improves versatility

- To change colours just replace the blue clips on the buckets with the colour clip you require
- All kits come complete with 8 clips (BRYG).
- Mop Pads and Extension handle feature cut off
- BRYG colour code tags or rings

Spray Express

SprayExpress is a highly professional tool. Designed to make a difference wherever speed, ease of use and lack of storage space are issues. Forget the bucket – SprayExpress is always ready to use!

- Top grip – Ergonomic grip with anti-slip rubber ring for better storage.
- Spray trigger – Simply pump water by sliding the red handle downwards. Easy and fast!
- Middle grip – Comfortable and secure grip thanks to the semisoft black rubber.
- Cleaning solution tank – The 0.6 liter tank can be removed, filled and reinserted in its housing in just a few seconds. Allows up to 200 m² / 2,152 sq. ft. cleaning area under normal conditions.
- Spray nozzle – Five holes for instant and even water release just behind the mop frame.
- Nozzle clip – For quick cleaning of the nozzle whenever needed.
- Express frame – With Velcro strips for fast and easy fixation of the mop.

Spray Express Moppads - Velcro Style

Express Trio Loopmop

- Different fibers combine to provide high performance, absorbency and durability for improved hygiene
- **White zone:** Microfiber for high mechanical cleaning action with minimal chemical use
- **Grey zone:** First quality polyester provides low friction and high durability
- **Beige zone:** Blend of polyester and viscose to provide absorbency
- Washable approximately 500 times at 60° C / 140° F

Express Microspeed Plus

- White with Abrasive Strips
- Microfibers are specially designed to offer performance, absorbency and durability
- Slip Microfibers sewn on fringe to help clean baseboards
- **White zone:** Microfiber for high mechanical cleaning action with minimal chemical use
- **Blue/Grey zone:** Abrasive strips for scrubbing tough dirt
- Washable approximately 700 times at 60°C/140°F

The Sweep System

How to cut costs and defeat bacteria. All at the same time.

Some say it's almost a "mission impossible" to maintain maximum hygiene and reduce the risks of hospital infections whilst still being cost efficient and keeping daily cleaning simple and ergonomic. We don't agree. We say it's definitely possible to reach higher hygiene levels and cleaning standards without blowing any budgets. With Vileda Professional one-step pre-prepared method, efficient system solutions and proper support, we can help you reaching your goals – maximum cleaning performance, preventing cross contamination and hospital infection and keeping the costs down. Also – virtually all of the Vileda Professional product range is available in four colours, to allow end users to comply with set or customized colour coding practices.

Why pre-preparation?

The pre-prepared method is exactly what it says – every utensil needed for the cleaning tasks are carefully prepared in advance (in a washing machine or manually) and put in convenient boxes, so there is no need for carrying water around the cleaning areas anymore. Instead, dirty mops and cloths are quickly replaced by freshly laundered ones. The advantages of the pre-prepared method are plenty, with clear benefits for both your organization and your patients.

- Superior ergonomics due to no heavy handling of buckets, no wringing or rinsing of mops, lightweight and easy-gliding mops.
- Microfiber mops for superior cleaning result and floors back in use faster.
- Faster cleaning as no handling of water is needed.
- Easy-to-control dosing reduces costs for cleaning chemicals.
- Prevents contamination between patient rooms.

Sweep is the name of the game

Vileda Professional Sweep is a complete system for the one-step pre-prepared cleaning method. Tailor-made for hospital cleaning and the very best and most powerful one on the market. Sweep is the most complete and advanced microfiber cleaning system of its kind on the market, and can be used not only for cleaning of floors and stairs, but also for walls, ceilings and hard to reach places. For maximum result, Sweep is accompanied by a range of other high performance cleaning products, such as the famous Evolon technology microfiber cloths. With the help of our expertise in mechanical cleaning – plus customized training and continuous support – you'll get the very best out of your investment.

Award-winning, cost efficient and complete system

Again – Sweep from Vileda Professional is the market leading and most comprehensive solution, offering superior cost-in-use. The complete system includes everything needed for effective and time-saving cleaning – microfiber mops & cloths, frames, handles and accessories for dry, damp and wet cleaning.

Choose between Sweep Classic or the new Sweep Duo. The latter features double-sided high performance mops which allows up to double the cleaning area with just one mop.

Perfect for larger patient rooms or corridors.

Sweep Duo have won several international awards for out-standing functionality and design, such as iF product design and Red Dot award.

winner 2006

The Swep System

Scientific tests prove the cleaning performance – up to 99,9 % bacteria removal

The BMA Laboratory in Bochum, Germany, carried out a test to determine the microbiological cleaning performance of Vileda Professional products. No chemicals or disinfectants were used in the test.

Bacteria strains were applied to an uncoated PVC floor material, which was then cleaned with Vileda Professional products that were moistened with a pre-defined amount of neutral cleaner. The result was outstanding – up to 99,9 % removal of bacteria (*Pseudomonas aeruginosa* and *Staphylococcus aureus*).

Swep MicroPlus mop **99.92 %** bacteria removal
Swep MicroTech mop **99.66 %** bacteria removal
MicroSpeed Plus mop **99.95 %** bacteria removal
QuickStar micro cloth **99.93 %** bacteria removal

Enhanced for today's Healthcare environment

The Swep Microfiber cleaning system combines the latest materials and cleaning methods to remove the inadequacies of traditional systems.

Reduced cross contamination/improved hygiene

After the cleaner finishes in one room/area they simply change the mop and place another pre-prepared mop on the frame for use in the next room/area. The soiled mop is then placed into a bag for laundering.

Improved ergonomics – never wring a mop again!

A key objective in the development of the system was to reduce the effort required by the cleaner. Pre-prepared mops replace heavy buckets and wringers and the use of low-weight tools and materials reduces the muscular stresses on cleaning operatives.

Chemical savings

The controlled pre-preparation method and mechanical action of the microfiber mops drastically reduce the amount of chemicals required in the cleaning process.

1000 wash guarantee

All mops in the Swep range are guaranteed to last 1000 wash cycles if correct washing protocols are followed – that's nearly three years' lifespan if laundered daily.

Damp mopping – floors are back in use quicker

The controlled dosing system leaves each mop damp enough to remove dirt without leaving the floor wet, which results in floors getting back in use quicker.

Pre-prepared mopping with equal dosing

Mops are centrally prepared before cleaning with the correct amount of water and chemical. This method removes the need for wringing or rinsing during the shift, reducing cleaning time. The Swep dosing method ensures each mop is pre-dosed with an equal amount of water, guaranteeing effective cleaning from all the mops.

Swept Classic Mop Frame

- Lightweight, durable plastic frame, trapezoid shape
- Multi-directional swivel head for easy dirt removal – able to fit in narrow places
- Instruction of cleaning direction by arrow shown on top of frame

Swept Duo Microfiber Cleaning System

New product 2008

The art of doubling the cleaning area without making an effort.

Two- sided mops = twice the cleaning area

The new Swept Duo System gives you the same great cleaning performance on both sides of the mop. This means up to the double area cleaned by each mop, and half as many mop swaps. It's quite obvious that this saves cleaning time, but it also means a lot of other savings.

Fewer mops = lower costs

If you're looking for cost cuts, you'll soon discover that fewer mops have to be purchased, washed and pre-prepared. And fewer mops have to be brought to the cleaning area. Lower costs? Of course, and besides – you can still keep on using your single-sided Swept mops, which means that the initial investments can be kept down, and you'll have maximum flexibility right away.

A new standard in ergonomomy = healthier staff

The Swept Duo System is designed to relieve and facilitate, in every detail. One example is the new, ergonomically designed and colour-coded handle with various hand positions and a soft rounded top, shaped to suit the palm. Then note the low weight and the quick, distinct handle length adjustment. Experience the easiness of flipping the frame around, and how simple it is to change mops. No strange features, just smart solutions. But totally unique for the Swept Duo System.

A complete system = solves every task

The jointed 3D-connection between handle and frame makes it easy to manoeuvre the mop – even in rooms tightly packed with furniture. The Swept Duo System is perfect for office environments, residential properties and schools, but also suitable for healthcare, hotels and restaurants. So, if you want to make a difference when it comes to ergonomomy and economy – choose Swept Duo System. Twice as intelligent.

- **Two-sided flip-frame** - doubles the cleaning area
- **Trapezoid shape** - ideal for corners, stairs and hard-to-reach areas
- **Two-sided mops** - fewer mops to wash, pre-prepare and to store

MicroPad Cleaning System - Velcro Style

MicroPad – Wet

New product 2008

Due to a special twisted process the micro-wet pads keep their shape longer and prevents less linting in comparison to other types of pads.

MicroPad Wet pads are made with ultra fine micro fibers which remove more dirt and bacteria than old traditional methods.

New generation Velcro backing lasts longer, hold up better against repeated launderings and attaches more securely to our frames

MicroPad Wet pads are designed to withstand repeated washings and are sewn for superior strength with a polyester colour coding fringe.

- No internal sponge allows Marino MicroPad Wet pads to launder and dry better in commercial driers.
- MicroPad Wet pads last 25-35% longer than economy wetpads.

Code	Description	Size	kg	lbs	Cube m	Cube ft	Pack
MF4011	MicroPad wet pad	28 cm / 11 in	.68	1.5	.68	.005	6
